Heritage - Exterior:

original 1968 building was a two-story building addition to the west of the Research Institutes. The

Biopsychological Research Building B08

1998 renovation added several floors to the structure with a circulation spine on the north facade. The original massing and cladding of the building related directly to the Research Institutes complex.

Heritage - Interior:

No architectural features remain from the original 1968 building. Interior finishes are substantially unchanged from the 1998 renovation and consist of vinyl composition floor tile with resilient wall panels. Offices and laboratories have received periodic remodeling to prepare for new grant programs; finishes substantially replicate the building standard.
